

Collier – Lee - Charlotte
Traffic Incident Management Team
October 9, 2019
Meeting Minutes

Attendees:

<u>Name</u>	<u>Agency</u>	<u>Name</u>	<u>Agency</u>
Kevin Smith	Parsons	Bud Gruber	Bald Eagle Towing & Recovery
Charles Stratton	Metric Engineering, Inc.	Kevin Salsbery	FDOT
Brandy Boccuti	Metric Engineering, Inc.	Bill Floyd	Lee Co. Emergency Management
Robbie Brown	FDOT	Dominic Konieczki	Lee Co. Sheriff's Office
Brian Raimondo	Lee Co. MPO	Ray Mikol	HNTB D1 TMC
Raul Corbo	Anchor Towing	Gene Rogers	South Trail Fire District
Reginald Faust	DBI Services	Mike Smith	DBI Services
James Lear	Cape Coral PD	Lyndsay Sutton	DBI Services
Frank Gentilquore	Bald Eagle Towing & Recovery	Mark Taylor	A Budget Towing
Tom Arsenault	FDOT-LEL	Facundo Mutte	DBI Services
Cathy Bartley	FDOT	Rob Low	Greater Naples Fire
Lina Cerquera	FDEP		

Call to Order: The Collier-Lee-Charlotte TIM Team meeting was held on Wednesday, October 9, 2019 at 9:30 AM at SWIFT SunGuide Center, 10041 Daniels Parkway, Fort Myers, Florida 33913. Charles Stratton, Brandy Boccuti and Kevin Smith facilitated the meeting.

Introductions:

Team members introduced themselves and the agencies they represent.

Agency News:

Road Rangers

No agency updates

Towing and Wrecker News

No agency updates

Other Agency News

TMC informed the team that they have two wrong-way pilots that they will be performing. Updates will be provided in future meetings.

The team was reminded that the TIM team has a First Responder Appreciation Award which recipients are nominated among their TIM piers.

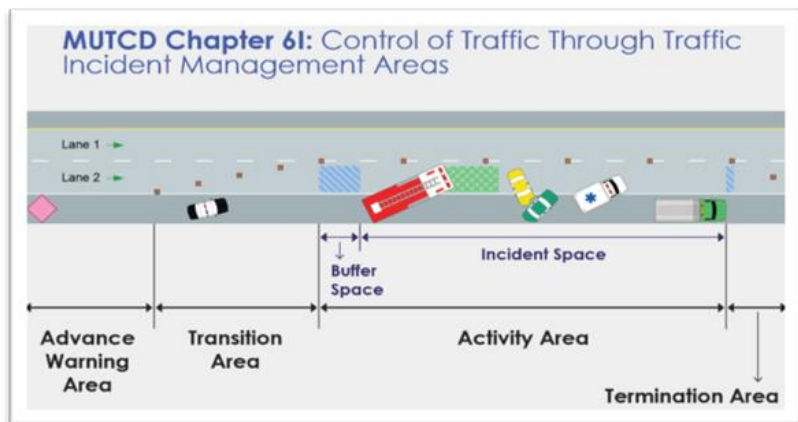

Update on TIM Initiatives:

National/State/Regional

Kevin Smith, Parsons Corporation, presented to the team on the importance of advanced warning and a traffic incident management area.

Traffic Incident Management Area Components:

- A Traffic Incident Management Area is a type of temporary traffic control zone
- While there are similarities, there are also significant differences between a work zone and a traffic incident
- The time to plan and availability of resources are the main differences between the two
- A Traffic Incident Management Area is a type of emergency event
- Review the four main components of a Traffic Incident Management Area, which will be discussed in detail in this lesson:
 - Advance Warning Area
 - Transition Area
 - Activity Area
 - Termination Area
 - The Activity Area is further comprised of a Buffer Space and an Incident Space
 - Reference:
 - MUTCD Chapter 6I – Control of Traffic Through Traffic Incident Management Areas

Advance Warning Area:

- Established upstream of the incident to alert drivers of the upcoming incident scene
 - Should also be upstream of any traffic queues so that warning is given to road users before encountering stopped traffic. Will likely have to be adjusted as queue lengthens.
- Should be high priority for emergency responders
- A shoulder taper, set up using traffic cones, may also be established in the Advance Warning Area

Upstream Queue Management:

- A responder vehicle strategically placed on the shoulder upstream of an incident with its emergency lights activated can help slow motorists approaching an incident scene
 - This role is typically filled by law enforcement or a Safety Service Patrol

Cone Tapers:

- At incident scenes, cones or flares used to establish a taper are typically placed no further apart in feet than the speed limit
 - 35 mph = 35' apart

- 45 mph = 45' apart
- 55 mph = 55' apart
- 65 mph = 65' apart
- Alternative methods:
 - Place a cone at every skip line
 - Place a cone every 10 paces

- Clear the lanes as quickly as possible
- Delineate your work zone with cones
- Deploy a cone taper as soon as possible
- Wear your vest!
- Train. Train. Train.
- Always expect the unexpected.

To view the full presentation, please visit our TIM team website at: <http://www.swfltim.org/>

Charles Stratton, Metric Engineering, informed the team about the District One Road Ranger that is being recognized for going above the call of duty. The Road Ranger was patrolling the Skyway Bridge when they came upon a man that was outside of his car on the bridge and was contemplating suicide. The Road Ranger got out of his truck and was able to calmly speak to the man and keep him calm until the Florida Highway Patrol was able to arrive on scene. The kindness and dedication of the Road Ranger was able to save the life of the man. The Road Ranger will be presented with an award for going above the call of duty at the Hillsborough TIM Team meeting on November 19th.

Charles Stratton, Metric Engineering, spoke to the team about receiving their feedback and/or suggestions for TIM presentation topics, improvements, and/or action items that they would like to see incorporated into future TIM team meetings.

The following items were recommended from the TIM team members:

- Send out survey to all responders to confirm contact info, questions they may have and their territory and job responsibilities.
- Update and bring notification list to the next meeting
- Periodically conduct a hands-on table top exercise
- Challenge each attendee to bring someone with them to the meetings.

- Develop a "Frequently Asked Questions" hand-out.
- Rotate through each Responding Agency to present and discuss their duties and responsibilities on scene.

Charles Stratton, Metric Engineering, reviewed with the team the results of the 2019 Traffic Incident Management Self-Assessments. A critical component of capitalizing on the success of existing programs and aiding the development of new TIM programs is periodic evaluation of the components of successful multi-agency TIM programs. The TIM SA was designed to provide an easy-to-use tool for measuring TIM program performance.

The TIM SA consisted of a series of 55 questions which were organized into the following sections and subsections:

Strategic:

- Formal TIM Programs (11 questions)
- TIM Training and After Action Reports (5 questions)
- TIM Performance Measures (12 questions)

Tactical:

- TIM Laws (3 questions)
- Policies and Procedures for Incident Response and Clearance (14 questions)
- Responder and Motorist Safety (5 questions)

Support:

- Data Collection/Integration/Sharing (5 questions)

The results will help in identifying areas of improvement in the three categories as shown above.

To learn more about the TIM SA, please visit the following website:

https://ops.fhwa.dot.gov/eto_tim_pse/preparedness/tim/self.htm

Brandy Boccuti, Metric Engineering, informed the team about the 2019 National Traffic Incident Response Week which will take place November 10-16, 2019.

The Federal Highway Administration as National Traffic Incident Response Week to draw public awareness to the dangers emergency responders face when reacting to a traffic incident. At the same time, it is important that drivers understand they are also at risk of injury or death in and around these scenes. Visit the TIM Network website to learn more: <http://timnetwork.org/traffic-incident-response-awareness-week/>

Brandy Boccuti, Metric Engineering, spoke to the team about the First Responder Public Opinion Poll that was conducted by the National Safety Council. The poll was to help understand the attitudes and behavior of the driving public as it relates to first responders that work on the highways.

Below are the top results that were discussed with the team:

- 71% Reported they take photos and text while driving by emergency workers
 - Which is triple the average of 24% that take photos and text under normal driving conditions
- 60% Reported they post to social media while driving by emergency workers
- 66% Reported they email about the event as they are passing by emergency workers
- In 2018 the first responder deaths working on the highways was up 60% compared to 2017.

- 2019 is already above the average of 2018!

To view the full poll, please visit our TIM team website at: <http://www.swfltim.org/>

After Action Reviews (AAR) provide agencies with actionable intel on an incident or event that can be used for improved strategies for future occurrences, demonstrating the benefit of quick clearance practices and improve cross-agency coordination and communication.

AARs were performed on the following recent major incidents:

09/12/2019

Event Numbers 721540

I-75 Northbound at Exit 101

Serious Injury Crash

Collier County

Timeline:

1504	FHP	Crash reported, one person pinned under overturned vehicle
1512	FHP	312 started wreckers (Victory Towing)
1525	TMC	FHP & DBI diverting traffic onto Exit 101
1531	FHP	DBI en route for MOT
1533	FHP	Med Flight on scene
1550	TMC	Med Flight departs
1558	TMC	Second Med Flight on scene
1613	TMC	Med Flight departs
1614	TMC	DBI clearing debris from roadway
1614	FHP	Opening #1 lane
1620	FHP	Opening all lanes (roadway clearance)
1654	TMC	Both left and right shoulders still blocked
1710	TMC	Only right should still blocked
1734	TMC	Incident clearance

Lessons Learned:

FHP started wreckers early in the call- this allows for quicker roadway clearance.

FHP, Road Rangers, and DBI started a detour early in the call. This helped alleviate a lot of queue from forming on I-75 and kept traffic moving on the detour route.

Even though this had serious injuries, FHP was able to open lanes of travel under 70 minutes from the start time of the incident., achieving roadway clearance in less than 90 minutes. Within 10 minutes of the medical flight clearing the scene, they had all lanes open.

FDOT Construction Update

Brandy Boccuti requested that all TIM Team members make sure they are receiving the District One Weekly Road Watch Reports and to contact him if there were any concerns.

Active Construction:

No updated information was provided by the TIM Team.

Completed Construction:

No updated information was provided by the TIM Team.

Anticipated Future Construction:

No updated information was provided by the TIM Team.

Additional construction information is available on the FDOT Road Watch website located at <http://www.dot.state.fl.us/publicinformationoffice/D1/news/newsreleases/default.shtm>.

Future Meetings:

The next Collier-Lee-Charlotte County TIM Team will be held on December 11, 2019 at 9:30 AM at the SWIFT SunGuide Center, 10041 Daniels Parkway, Fort Myers, Florida 33913.

As always, please continue to visit the TIM Team website for updates, and also help support our TIM Team by providing the TIM Team website to others that may be interested in joining our team!

<http://www.swftim.org/>

If you have any questions or need additional information, please contact Brandy Boccuti, Metric Engineering, Inc. at (407) 644.1898 or via email at bboccuti@metriceng.com
