Sterling Bond, FDOT District One, Traffic Incident Management Center (TMC) Manager, and Ray Mikol, TMC Assistant Manager, provided a brief update on the TMC's current operations. They discussed:

- Continued coordination with first responders for major incidents.
- System monitoring capabilities and communication tools used to support incident response.
- Ongoing commitment to safety and real-time traffic management.

Update on TIM Initiatives:

Beau Baggett, Metric Engineering, reminded the team about the purpose of the TIM Meeting.

- TIM is the coordinated detection, response to and removal of traffic incidents as quickly and safely as possible. TIM is a coordinated effort among multiple agencies.
- The primary purpose of TIM is to reduce the duration and impact of incidents as well as to improve the safety of motorists and most importantly our incident responders.
- The TIM Meeting is to help prop up communication, coordination, and collaboration among our incident responders.

Beau Baggett, Metric Engineering, provided the Road Ranger performance statistics.

After Action Reviews (AAR) provide agencies with actionable intel on an incident or event that can be used for improved strategies for future occurrences, demonstrating the benefit of quick clearance practices and improve cross-agency coordination and communication.

FDOT District One, Satellite Traffic Management Center Tour was led by Sterling Bond, FDOT District One Traffic Incident Management Center (TMC) Manager, and Ray Mikol, TMC Assistant Manager. The team was provided with an informative overview and guided tour of the FDOT District One Satellite Traffic Management Center (TMC), located within the Manatee County Public Safety Center. The tour was led by Sterling Bond, TMC Manager, and Ray Mikol, TMC Assistant Manager, who shared insights into the critical role of the TMC in real-time traffic monitoring, incident coordination, and responder support.

Highlights of the tour included:

- Advanced Traffic Management System (ATMS): Centralized control of DMS, cameras, and ITS field devices.
- Live CCTV Monitoring: Demonstrated how operators maintain situational awareness and dispatch support quickly.
- RISC Activation & Support Tools: Overview of their process in initiating and supporting RISC events.
- Integrated Communications: Showcased coordination tools used during multi-agency response efforts.

- **Data Visualization Dashboards:** Used to assess incident durations and identify areas for operational improvements.

The tour highlighted the collaborative relationship between the TMC and incident responders, reinforcing how integrated technologies and proactive coordination lead to improved safety and efficiency on Florida's roadways.

FDOT Construction Update
